EDUCATION

INSTITUTO SUPERIOR TÉCNICO, UNIVERSIDADE DE LISBOA

MSC IN COMPUTER SCIENCE

Software Engineer
Intelligent Systems

Finished Nov 2016 | Lisbon, Portugal
Final Average: 17 out of 20

Thesis in HRI: Rapport - Establishing
Harmonious Relationships Between
Robots and Humans

Coursework

Advanced Programming
Distributed Applications
Natural Language
Network and Computer Security
Search and Planning
Software Architecture

BSC IN COMPUTER SCIENCE

Finished July 2014 | Lisbon, Portugal
Final Average: 17 out of 20

Coursework

Artificial Intelligence
Analysis of Algorithms
Compilers
Logic for Programming

ABBOTSHOLME

ENGLISH LANGUAGE PROGRAMME
August 2010 | Staffordshire, England

LANGUAGES

Portuguese: Native
English: Full Working Level Proficiency
Spanish: Elementar
French: Elementar

SKILLS

PROGRAMMING

2 years working in:

Swift • iOS • Java • Git • LISP

1 year working in:

Python • C • C# • C++ • Unity

Short projects:

Obj-C • Android • Machine-Learning •
Natural-Language Processing

EXPERIENCE

CARBON BY BOLD | IOS DEVELOPER

December 2016 - Present (3 months) | Lisbon

- Developed from ground up three different **iOS** projects for external clients;
- Researched and developed tools to shorten the development time for new features such app integration with remote API's and animations;
- Developed an **iOS** project with strong **security** protocols to assure **confidentiality** and **privacy** of the sensitive data exchanged between the mobile device and the remote server.

ANITA BORG | GOOGLE SUMMER OF CODE MALARIA-IOS MENTOR

March 2016 - September (7 months) | Online

- Evaluated student's proposals regarding their understanding of the project, their engagement, and the proposed timeline;
- Provided guidance and did code reviews (**Swift**).

ANITA BORG | GOOGLE SUMMER OF CODE MALARIA-IOS STUDENT

May 2015 - September 2015 (5 months) | Online

- Redesigned and improved the **iOS App** in **Swift** with success as it met the required requirements and was nearly identical to the expected design;
- Designed the architecture with a clear separation between presentation, data and logic measured by its **testability**, **modularity** and **readability**.

FENIXEDU | IOS DEVELOPER

October 2014 - November 2015 (13 months) | Lisbon

- Developed and released the first official **Técnico Lisboa iOS App** in **Swift** used by Portuguese and international students.
- Integrated the schedule of classes and exams with the native calendar;

RESEARCH

GAIPS INESC-ID | SUMMER INTERNSHIP

July 2014 - August 2014 (2 months) | Oeiras

- Developed an emotive agent on Robot **Baxter** to manipulate randomly placed objects using **ROS** and **OpenCV** ([📺 4G643DbAGfg](#));
- Consolidated the architecture as measured by its **maintainability** and **reusability** by streamlining the launcher, by abstracting the facial features generation, and by refactoring the algorithm to support different objects.

UNIVERSITY EXTRACURRICULAR WORK

INSTITUTO SUPERIOR TÉCNICO | MEIC COURSE DELEGATE

October 2014 - November 2015 (13 months) | Lisbon

- Promoted the quality of MEIC courses, ensuring that the teaching methods were effective and according to Técnico Lisboa's regulations;
- Solved **conflicts** between students and professors by **negotiating** solutions that benefited both parties.

AWARDS

March 2016	8th place (out of 13)	Unbabel NLP Challenge
2012-2013	Performance Award	Volunteer Work at Natura Observa
2011-2015	Academic Award	Instituto Superior Técnico
